

EXAM MANUAL

- 1) CERTIFICATION PROCESS
- 2) EXAM CONFIGURATION

eLearnSecurity has been chosen by students in 140 countries in the world
and by leading organizations such as:

1. CERTIFICATION PROCESS

STEP 1: OBTAIN A VOUCHER

Whether you are attempting the eJPT certification exam on your own or after having attended one of our approved training courses, you will need to obtain a voucher before you can start your certification process.

Please note that the Penetration Testing Student course includes a free voucher in all plans.

Once you obtain the voucher, you will receive login credentials to our Members area (*Exams* menu) where you will manage the exam, the VPN credentials and anything related to the certification process.

STEP 2: BEGIN THE CERTIFICATION PROCESS

Standard vouchers expire after 180 days from purchase. Vouchers bundled with an Elite course do not expire.

When you are ready to start (and before the voucher expiration date), you can begin the certification process by clicking on the "Begin certification process" button, inside the *Exams* tab of the member's area

A rectangular button with a light gray background and a thin border. The text "Begin certification process" is written in a bold, black, sans-serif font. The button is overlaid on a background featuring a large, faint red circle with a diagonal line through it, and a keyboard with binary code (0s and 1s) overlaid on it.

Begin certification process

The expiration date is always shown in your certification area, and reminder emails are sent as the expiration date approaches.

STEP 3: PERFORM YOUR TESTS

As soon as you click on the "Begin certification process" button, you will be able to download a compressed archive containing some material and instructions regarding the scope of engagement. You can download it from your members area, *Exams* menu, eJPT section (*Download Letter of Engagement* button).

The letter of engagement will contain exactly what you should test and how, so please read it carefully.

At this point, you will start your penetration test against the designated targets. You can decide if you want to take notes about your findings and then answer the quiz questions, or first read the questions, perform your tests, and then answer the questions (recommended).

The exam network will always be available 24/7 for 3 days and dedicated to you.

At any time, you will be the only one on the network, and you will be able to reset the scenario should you damage it during your tests.

You can also pause the lab and resume from where you left off by simply clicking Start/Stop buttons in the *Exam* menu of the Members area, as you would do with any other Hera Lab scenario.

STEP 4: ANSWER THE QUESTIONS IN THE QUIZ AREA

During or after your penetration test, you have to take a quiz test consisting of 20 multiple-choice questions.

You can respond to these questions during the 3 days of the exam.

Every correct answer will give you one (1) point. You need at least 15 points (75%) to pass the exam and obtain the eJPT certification. Once you submit your exam, you will immediately receive the final score. Failing to pass the test will determine the loss of the attempt. **eLearnSecurity will not provide the solutions to the questions you got wrong.**

If you have a *Full* plan you have 1 free retake should you fail to pass the test.

If you have an *Elite* plan you have 3 free retakes should you fail to pass the test.

Retakes should be started within 14 days from the previous failed attempt.

STEP 5: OBTAIN RESULTS

Once you pass the exam, you will find the digital certificate immediately verifiable and downloadable. You can also share your newly acquired certificate with HR or LinkedIn (available with Full and Elite plans only).

2. EXAM CONFIGURATION

The exam configuration is the same used in the **Hera Manual** for virtual labs.

Please check how to configure the lab environment at the following link:

[Hera Manual](#)

STEP 1: THE PENETRATION TESTING SCENARIO

You can start the exam scenario by accessing your Members Area, Exams, eJPT, and then going to *Exam Environment*.

As with any other Hera Lab scenario, you have to click *Start* to run it.

Please refer to the Hera manual for further information.

Exam Environment
